

A virtual reconstruction of the Mohenjo-daro civilization, showing a grid-like city layout with a river and a large white cliff in the background.

VIRTUAL REALITY MOHENJO DARO

MOHENJO DARO

WHY-

Historical Impact: Shows how railway workers reused Mohenjo-daro bricks, revealing how ancient sites get damaged through careless development.

Heritage Awareness: Highlights that even famous ancient cities faced real destruction, teaching visitors about the value and fragility of archaeology.

Dramatic Narrative: The “brick stealing” story connects ancient civilization and colonial actions, creating an emotional, engaging VR moment.

Conservation Lesson: Emphasizes why preserving heritage matters and how negligence leads to cultural loss.

ABOUT MOHENJO DARO

Mohenjo-daro is in Sindh, Pakistan, near Larkana, on the west bank of the Indus River.

It lies close to the historic Lahore–Karachi railway.

Bricks used for railway tracks were quarried from all major mounds and visible ruins of Mohenjo-daro, but especially from the Citadel and higher remains exposed at the site.

The 1870 Lahore–Karachi railway follows almost the same corridor used today, now called Main Line 1 (ML-1). Key stations like Multan, Rohri, and Hyderabad remain central.

The line runs about 8–10 km from Mohenjo-daro, with Larkana Station being the nearest stop.

Mohenjo Daro

EXPLORES TWO KEY PERIODS

British Colonial Era (1856 CE):

British engineers of the East India Company discover large baked bricks while building the East Indian Railway. Mohenjo-daro was rediscovered when railway workers collected ancient bricks. Artifacts were ignored, and the site was unintentionally damaged.

1920-1922

Official excavations begin at Mohenjo Daro under the Archaeological Survey of India. The site is now protected, researched, and preserved. Archaeologists carefully study what was once overlooked, highlighting how our approach to heritage has changed.

PLAYER PERSONAS

Lalchand Bheel

👤	Age:	45
🌐	Nationality:	Indian
📍	Location:	Awadh (Eastern Uttar Pradesh)
👷	Occupation:	Railway laborer (former farmer)
♂	Gender:	Male

Background:

Born into a poor tenant-farmer family, Lalchand grew up working in fields. When drought and debt struck, he was recruited by British contractors to work on railway construction near Mohenjo-daro. He left his village to earn wages and support his family.

FAMILY

- Wife: Sita, manages home in the village.
- Children: 2 sons (10, 7) and 1 daughter (4).
- Younger brother: Handles remaining farmland.

PERSONALITY TRAITS

- Kind, humble, empathetic toward fellow workers.
- Curious and observant, often notices details others ignore.
- Non-confrontational, avoids conflict.
- Loyal, dutiful, values family above all.

PHYSICAL APPEARANCE

Sturdy build from years of manual labor. Worn, simple clothes (dhoti, turban, cotton shirt). Rough hands, tanned skin from outdoor work.

ROLE IN STORY/GAME

While working, he uncovers hidden artifacts from Mohenjo-daro. His curiosity and discoveries become central to the narrative, contrasting with the overseer's strict and exploitative nature. He acts as a bridge between ordinary workers and the historical mystery unfolding.

Thomas Sebastian

👤	Age:	40
🌐	Nationality:	Indian
📍	Location:	England (Upper-class colonial officer)
👷	Occupation:	Railway overseer (mid-ranking colonial officer)

Background

Born into a wealthy English family with a tradition of military service, He was sent to India in his mid-30s to oversee railway expansion under the British Raj. He views his posting as both an opportunity for prestige and a burden, often expressing disdain for the climate, culture, and local workers.

FAMILY

- Wife: Margaret, lives in England, maintains correspondence but does not accompany him to India.
- Son: Charles (12), studying at a boarding school in London.
- Daughter: Eleanor (8), also in England.

PERSONALITY TRAITS

- Strict, authoritarian, and impatient with subordinates.
- Arrogant and dismissive of Indian workers' intelligence.
- Detached, prefers to maintain distance rather than familiarity.
- Occasionally insecure about his own importance, masks it with arrogance.

PHYSICAL APPEARANCE

Tall, lean, with a military bearing. Wears a pressed khaki uniform, polished boots, and a pith helmet. Clean-shaven with neatly trimmed hair, often carries a cane or riding crop. Maintains meticulous personal grooming, contrasting with the dusty worksite.

ROLE IN STORY/GAME

While working, he uncovers hidden artifacts from Mohenjo-daro. His curiosity and discoveries become central to the narrative, contrasting with the overseer's strict and exploitative nature. He acts as a bridge between ordinary workers and the historical mystery unfolding.

Prabhas Banerjee

👤	Age:	36
🌐	Nationality:	Indian
📍	Location:	Delhi, India (urban, educated background)
👷	Occupation:	Archaeologist, specializing in Indus Valley Civilization

Background

Born in Delhi to a middle-class family, with a retired officer father and teacher mother. From childhood, he was drawn to India's ancient heritage. Museum visits and history books fueled his passion for archaeology. He rose to become a lead researcher on South Asian civilizations at Mohenjo-daro.

FAMILY

- Parents: Supportive, though once skeptical of his career choice.
- Younger sister: A lawyer, practical and rational, often debates with him.
- Personal life: Unmarried, deeply focused on career and preservation work.

PERSONALITY TRAITS

- Analytical, detail-oriented, passionate about history.
- Curious and persistent follows clues relentlessly.
- Can be skeptical and sarcastic, especially when talking about colonial negligence.
- Balanced between awe for discoveries and frustration at how much was lost.

PHYSICAL APPEARANCE

Medium build, slightly rugged from years of fieldwork. Practical attire: cargo pants, shirt, boots, sunhat, glasses. Keeps excavation notebook and tools always on hand.

ROLE IN STORY/GAME

The player's evolved self is no longer just a laborer but an archaeologist, interpreting the very discoveries once stumbled upon. He reveals how British railway construction destroyed parts of Mohenjo-daro. Serving as a voice of revelation and reflection, he guides the audience to grasp the site's true importance.
